

# TITUS & ANNEKE

## INTRO

Hi! We are incredibly grateful that you are considering adoption and we pray for you, as you are on this journey. We would love to have children, and thanks to people like you, this might be a possibility.

We met each other when we were both in our thirties, having been through life experiences that made us who we are today. Having gone through some struggles growing up, we took our relationship very seriously. We both knew we wanted kids, but we also knew that there were challenges with infertility. Naturally, we looked into adoption as we have multiple friends who have adopted children.

We both really look forward to having a child of our own, raising this child in a loving home, with the active support of our many friends and our loving faith-based community.

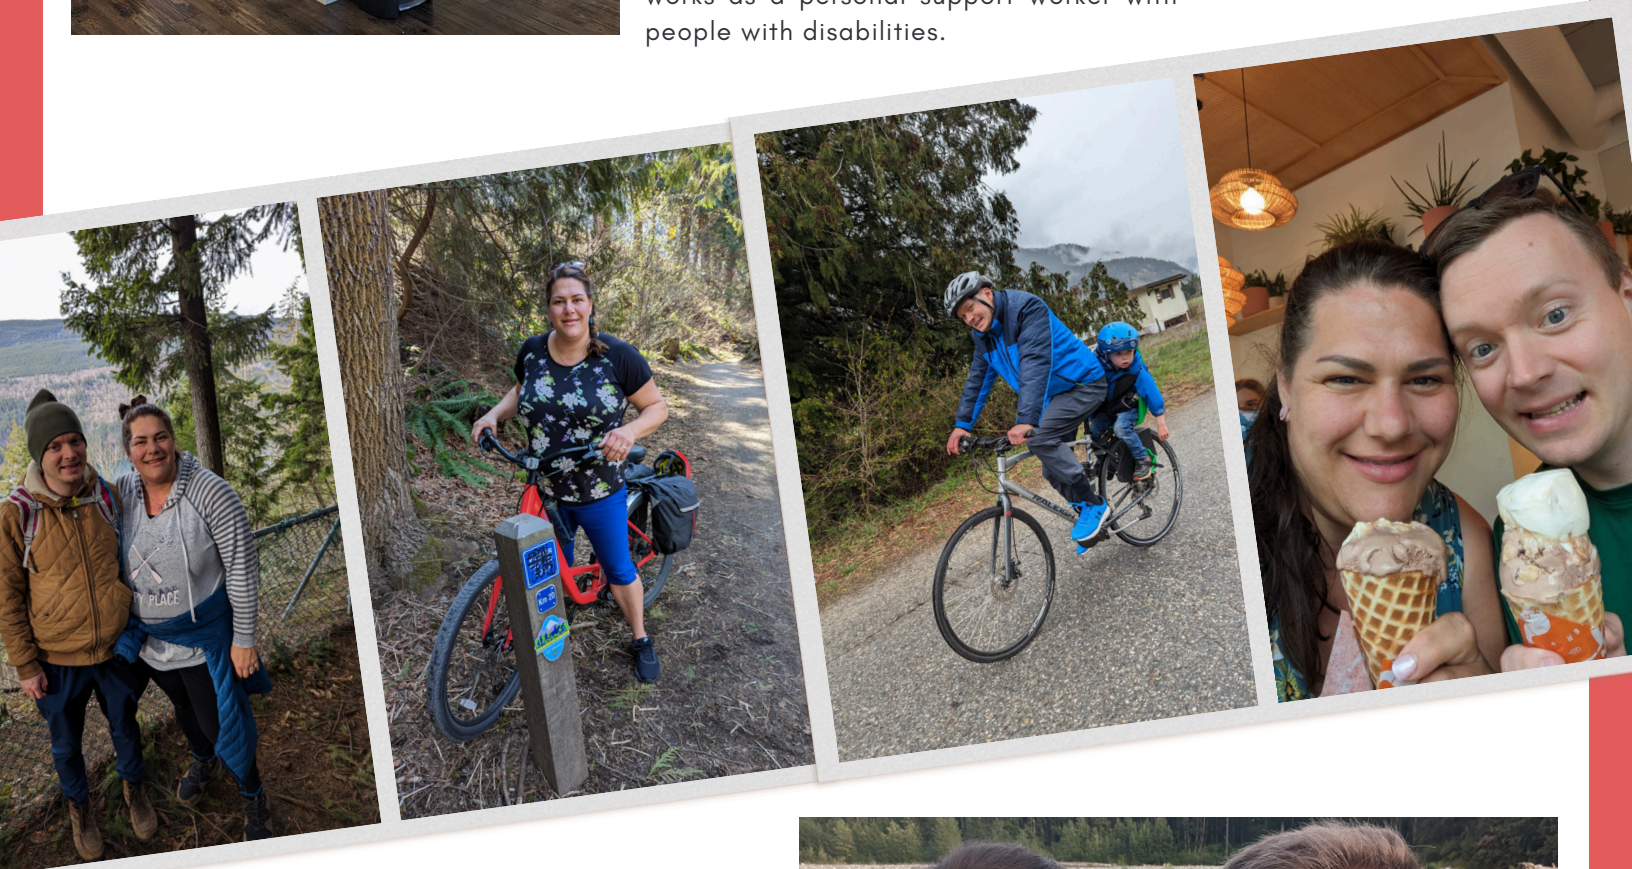

## A FEW THINGS WE LOVE + VALUE

- We love being active and spending time together. We like to go into nature, work in the yard, go out for a bike ride, go skiing, go swimming, walk by the river, or just read a book on a rainy day
- Family and friends are very important to us and we love visiting, celebrating events together and going on vacation together.
- We love God and our faith-based community
- Anneke loves to cook and Titus loves to eat her cooking :)
- We love to go on hikes and camping trips, often with our extended family and friends

## OUR HOME AND NEIGHBOURHOOD

We live in a modern, three-story townhouse in a mid-sized city in the Fraser Valley. Our home is in a safe, quiet neighborhood on the edge of town. There are parks, a café, and an elementary school less than a kilometer away. The city is surrounded by farmland, and there are plenty of rivers, forests, lakes, beaches and mountains in the area; which we love to go explore. We share our home with our beloved cats, Dax and Kira. Titus works mostly from home as a paralegal (legal researcher) and Anneke works as a personal support worker with people with disabilities.

## OUR PROMISE TO YOU

Thank you for considering us for the adoption of your child! We are far from perfect, we make mistakes and will do things wrong. However, we believe we can be the adoptive parents to your child and raise him or her with love, support, respect, kindness, and honesty. We promise that we will love your child through the easy and difficult times, through all the stages from baby through adulthood, and be with your child every step of the way. We promise that your child will never forget you. We will send you updates, meet with you, and have you part of your child's life, to the extent that you are comfortable.
